BrightEra™ **HDMI**

Stylish desktop projector for office and classroom, offering basic high performance and superior ease of use

The features of the VPL-D100 Series are well suited to a wide range of business and education applications, all available at a reasonable price. This user-friendly projector has a noiseless and simple design, and is highly portable and easy to setup – exactly what's required for a quick set up in your meeting room, client boardroom, lecture hall, or classroom.

With an auto power-saving function and long-lasting lamp replacement time of 10,000 hours, the VPL-D100 Series realizes good energy efficiency along with a good TCO. Sony's reliable BrightEra 3LCD panel offers bright and colorful projection. There's also the convenience of HDMI connectivity and an easy-to-use tablet and smartphone application. Delivering an ideal combination of basic high performance and superior ease of use, this reliable projector is sure to help you deliver engaging and attention-grabbing presentations.

FEATURES

Compact, Lightweight, and Stylish Design

The VPL-D100 Series has a compact and lightweight body with a small footprint of approximately 315 x 75 x 230.5 mm (12 13/32 x 2 15/16 x 9 1/16 inches). It is also light-weight depending on the model, each unit weighs approximately 2.5 kg (5.5 lb)*¹ or 2.6 kg (5.8lb)*². This design ensures it is easy and convenient to carry into meetings and classrooms.

*1 VPL-DW122/DX142/DX122/DX102

*2 VPL-DW127/DX147/DX127

Good TCO, Energy-efficient Design

Energy Efficient With Long-Lasting Lamp Replacement Time (10,000 hours)

The lamp driver optimally controls the wattage of the lamp and achieves a long-lasting lamp replacement time of 10,000 hours with lamp brightness set to low. This extends the lamp replacement time by more than 43% compared with the previous model.

Lamp mode: low
Complies with IEC61947 standard

*Usage condition example : 8 hours per day x 5 times per week x 5 years
**The figures are the expected maintenance time and not guaranteed. They will depend on the environment or how the projector is used

Auto Power Saving Function

• Auto Mode (Auto Brightness Adjustment Function)

The brightness of the lamp's output is automatically adjusted depending on the brightness of the projected image, to avoid unnecessary power consumption.

When showing darker images that don't require high brightness, lamp output decreases.

• Lamp Dimming Function

The VPL-D100 Series projectors are equipped with a lamp dimming function. After 10 seconds of a static signal feed, the lamp dims by approximate 15% which is hardly noticeable. If one of these projectors is left powered on while not in use, after a set period of time it will automatically detect no change of signal input and will dim the lamp to as low as approximate 30% of original brightness to significantly reduce energy consumption.

• Blank

The VPL-D100 Series projectors can temporarily disable video signal output. This function can be easily operated with just the touch of a button on the supplied Remote Commander unit. In addition, this function allows blank image projection with low power consumption using lamp control technology.

ECO MODE Key

With a single push of the ECO MODE key on either the projector or the supplied Remote Commander™ unit, users can select an energy-saving setting from the ECO Mode menu.

High Image Quality

3LCD BrightEra™ Natural and Vivid Color Images

Thanks to the optical system constantly projecting three basic colors, the projector offers excellent light efficiency and this, ensures colorful and bright images. Sony's BrightEra™ panels deliver improved panel light resistance, higher resolution, high brightness, and increased panel reliability. High color reproducibility is important especially when using colorful content, such as materials typically used in classrooms.

3LCD Projection System

Various Picture Modes for Optimal Picture Quality

The projector has six available picture modes for correct picture quality: Dynamic, Standard, Presentation, Blackboard, Game, and Cinema. With six picture modes and three brightness modes combined, the user can select the most suitable picture / brightness combination according to the picture source and environment, to create the optimal image.

Dynamic

Optimized for presenting in a bright environment, with bright and colorful text, graphics, and images.

Standard

The picture is ideal to deliver a presentation under fluorescent lights in offices and class-rooms.

Presentation

This setting delivers the greatest light output, ideal in a bright environment, both inside and outside.

Blackboard

Optimized to deliver clear images on a blackboard in the classroom, supporting teaching where there is no projection screen.

Game

Ideal to enjoy games in a living room with lots of ambient light.

Cinema

Fine tuned to enjoy movies in a room with indirect lights

Ease of Use

Network Presentation*1 (LAN)

When the projector is installed in a LAN, presentations can be projected from any PC and Mac on the network. A tablet or smart phone can be connected at the same time. You can project jpg, pdf, and other supported formats. Up to four users can project PC / Mac images simultaneously, while up to eight*2 users can connect to one projector.

Wireless Presentation Software

For MS Windows / Mac OS: Projector Station for Network Presentation

For iOS / Android OS: VueMagic*3

*1 VPL-DW127/DX147/DX127

*2 Up to seven users for wireless.

*3 The application for tablets and smartphones is provided by Pixelworks.

For details, please visit the following website:

Projector Remote

Input Label*1

Input label which appear in the input menu on screen can be customized. This gives users a clear understanding of which equipment is connected.

*1 VPL-DW127/DX147/DX127

Other Features

Closed Captioning

Official teletext broadcasting, developed by the NCI, USA

Network and Control*1

Controls and monitors projector status
 Compatible with various control systems

*1 VPL-DW127/DX147/DX127

USB Display*1

The projector allows you to display pictures and audio*2 with one USB cable. You do not need to install any driver for this function. This is a convenient and very easy way to connect to the projector.

*1 VPL-DW127/DX147/DX127

*2 There is a time lag in video and audio. Beyond basic usage, Line-in or HDMI-in is recommended.
